Wooden Leg

Americana? Roots music? Alt-Country? Hillbilly Rock? Wooden Leg's music defies musical boundaries and this live recording captures the band doing what it does best.

"We have had hundreds of bands on this stage, but I don't think we've had any more formidable band than these guys."

-Bill Hurley, Extended Play Sessions at the Fallout Shelter, April 6, 2019

What do you get when you combine a crooning bluegrass mandolin master, a veteran bassist, a fiddler who plays through fuzz boxes and wah-wah pedals, sounding more like Jimi Hendrix than Papa John Creach, and a big band swing drummer who inexplicably feels moved to pound the skins harder than John Bonham on a bender? Do you call it country, folk, bluegrass, rock 'n' roll, or maybe just a freak of nature? Just call it Wooden Leg, and give the group room to do its thing. It's much safer that way.

-David Wildman, Boston Globe, January 25, 1998
